## ***Your worry-free ticket to the open road.***

Think of all the places that you'd like to visit "someday." Breathtaking natural wonders like the Grand Canyon and Niagara Falls. Vibrant cities like New Orleans and San Diego. One-of-a-kind landmarks like Mount Rushmore and Graceland. Why wait for "someday" when you can start today?

Your RV gives you the freedom to go wherever you want, whenever you want, whether you're seeking a weekend of peace and quiet or a summer of spontaneous adventure.

Despite the appeal of a road trip, you may worry about

safety issues along the way, such as losing steering control due to front-tire blowouts, strong cross winds, or potholes. If you're a new RV owner, you may not anticipate the difficulty of steering such a large vehicle, which can cause anxiety once you get behind the wheel.

The Safe-T-Plus steering control device relieves these concerns by making your RV safer, more stable and much easier to handle. Safe-T-Plus takes less than an hour to install and center, and requires no future maintenance or adjusting. Just sit back, relax and savor the drive!

## ***Be prepared for any twists and turns that come your way.***

The planning phase of a road trip is a whirlwind of activity and anticipation, when you narrow down the possibilities and start to make final decisions. Are you looking for snow or sunshine, mountains or ocean, relaxation or thrills? What reservations or to-do lists do you need to make in advance? Do you have all the supplies you need for the trip?

While you're taking steps toward making your dream trip a reality, make time for a quick phone call or email to learn how and where to purchase Safe-T-Plus Steering Control. In the amount of time it takes to pick out an atlas and a few guidebooks at the bookstore, your RV will be safely equipped with Safe-T-Plus to handle any challenges the road has to offer.

# Safe-T-Plus: The key to a feel-good driving experience.

## **Prevent Tiring Oversteering.**

Many road hazards are unexpected, and some are unavoidable. Safe-T-Plus helps drivers stay in control and on the road, even in dangerous driving conditions.

## **Front Tire Blowout Protection.**

The unexpected, sudden pull on the steering wheel from front tire blowouts is not only dangerous, it is also usually life-threatening to you and other drivers. Safe-T-Plus has proven again and again that it helps the driver stay in control in this situation and bring the vehicle to a safe stop.

## **Reduce Maintenance Costs.**

Safe-T-Plus is engineered to provide positive center point steering under all driving conditions. This reduces wear and tear on components associated with the steering assembly. Tires run longer and cooler with less tire scrub, which means less time in the shop and more savings.

### Peace of Mind Checklist

#### Equip RV to handle:

- ✓ Severe side winds
- ✓ Potholes
- ✓ Front tire blowouts
- ✓ Pavement drops
- ✓ Road ruts and bumps
- ✓ Soft shoulders
- ✓ Passing tractor-trailers

Find your local  
RV dealer on our website  
and ask them to install  
Safe-T-Plus.

# ***Our proven technology saves lives and money.***

Investing in Safe-T-Plus pays for itself by preventing accidents and costly repairs.

Uneven roads, oversteering, and accidents are tough on your RV. Safe-T-Plus protects your vehicle and your budget.

## ***Would you rather spend your money...***

Realigning your wheels and replacing steering components, struts, and tires worn down by oversteering

## ***OR***

Buying tickets to see a Broadway show or your favorite band

Touring Carlsbad Caverns

Hiring a guide to raft down the Grand Canyon

Whale watching along the coast of Maine

Eating at the finest restaurant in town?

***It's a no-brainer. Save your money for the fun stuff.***

# Why Our Customers Love Safe-T-Plus

We purchased a diesel coach and I had difficulty driving it. My husband could keep it under control but I had trouble keeping it steady in the lane because the steering was so sensitive to the touch. After installing Safe-T-Plus I felt so much more confident driving. It made all the difference in the world for me to handle the coach. We also had the Safe-T-Plus installed on our earlier gas coach and that made the steering better.

We highly recommend your product to all our friends. The information you provided about dropping the Safe-T-Plus when having front end work done was something we were not aware of and we will make sure that is done in the future.

**Shirley Cornelison**  
Cocoa, FL

I purchased a Safe-T-Plus after a cross country round trip from Florida, it makes a difference in my driving experience. I find now I can look around and enjoy the scenery, I don't need to take as many breaks, I can actually let go of the wheel.

**Dennis French**  
Tucson, AZ

We did have one experience on a narrow mountain road where I was forced onto the shoulder by a passing car. The recovery was easy, I feel the Safe-T-Plus made it easy. After recovering I did think to myself what would it have been like without the Safe-T-Plus. I'm sure I would have over corrected or been pulled further off the edge of the road without the Safe-T-Plus. I truly feel the Safe-T-Plus improved the handling and enjoyment of driving our Coach. I would recommend your product to anyone that feels uneasy when passed by large trucks. Your product makes driving long distances a joy.

**Fred T.**  
Fort Mill, SC
